

Where massive scale meets simple management

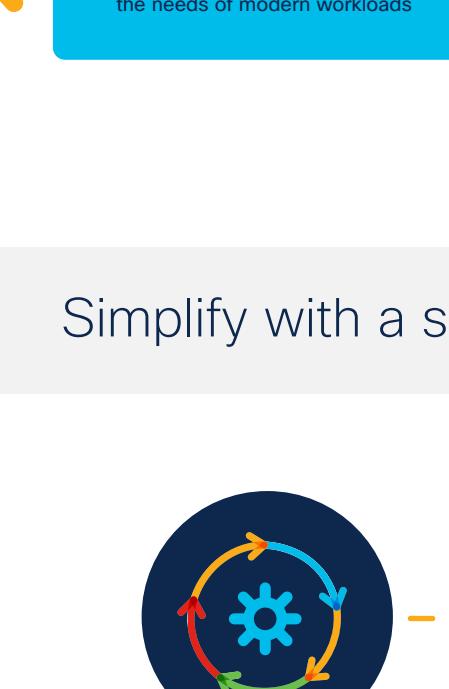

Introducing Cisco UCS X-Series powered by Intersight

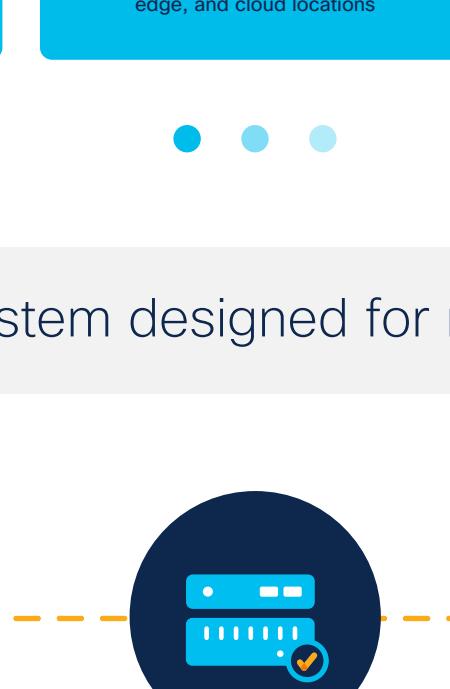

Supporting a growing, diverse hybrid application portfolio

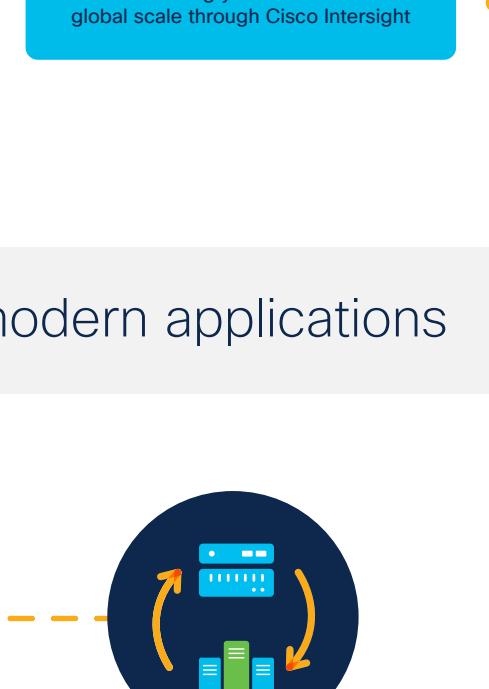

Hybrid cloud infrastructure for the next decade

An operation model to deliver services at global scale

Flexibility to run any workload at enterprise scale

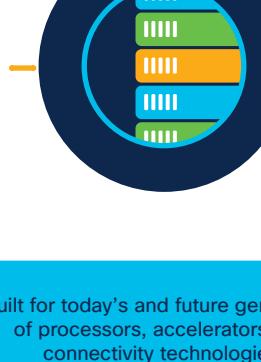

Engineered for the next decade

Simplify with cloud-operated infrastructure

Designed to be operated from the cloud, you can respond with the speed and scale to meet the needs of modern workloads

A unified, cloud-delivered platform that gives you visibility and control across your on-premises, edge, and cloud locations

Focus less on routine tasks and more on strategic outcomes by defining, automating, optimizing, and maintaining your infrastructure at global scale through Cisco Intersight

Unparalleled flexibility enabled by modular components that can be molded and shaped to the needs of your applications

The management advantages of blade servers with the capacity of rack servers in a single, modular system

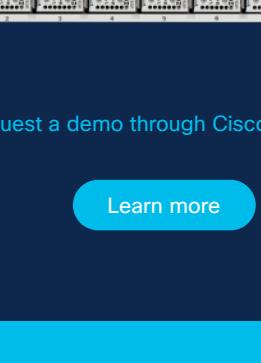

Consolidate onto a single platform that combines the density and efficiency of blade servers with the expandability of rack servers for better performance, automation, and efficiency

Simplify with a system engineered for the future

Enable emerging applications and technologies with an infrastructure and operational model that is always ready for what's next

Built for today's and future generations of processors, accelerators, and connectivity technologies, helping you reduce the risk of adopting future technology

A constant stream of new features delivered to you through the software-as-a-service model of Cisco Intersight gives you instant access when new capabilities are delivered
